Re: Annual Report of Hazardous Waste Exports for 2012
EPA Notice ID: 003493/9E/11

Dear Mr. Heiss,

The enclosed Annual Report of Hazardous Waste Exports for 2012 is submitted as required by 40 CFR 262.56. This report summarizes the type, quantity, and ultimate destination of the "hazardous waste" exported last year. The "hazardous waste" in this case is kettle dross, malformed or damaged plates, scrap grid metal, and other lead-bearing scrap from the manufacture of lead-acid batteries sent for reclamation. No exports of this waste stream occurred in 2012. Please note that under federal regulations, the referenced material would be exempt from classification as a hazardous waste under 40 CFR 261.2(c)(3), as a material being reclaimed. However, the Georgia Environmental Protection Division's Administrative Law Judge handed down a decision that, in essence, requires that by-products exhibiting a hazardous characteristic be classified and managed as hazardous waste until the material actually enters the reclamation process, rather than at the point the material is destined for reclamation, as discussed in the preamble to the original federal regulation.

Please let me know if you have any questions or need additional information.

Sincerely,

Exide Technologies

Mike Burgess
Plant Manager
